

Special Issue

Signal and Image Processing Applications in Artificial Intelligence, 2nd Edition

Message from the Guest Editors

This Special Issue focuses on the general application of artificial intelligence using signal and image processing, covering a broad range of research topics in which data-driven decision-making is employed. In addition, it aims to evaluate innovative research in which artificial intelligence provides a novel perspective. The scope of this Special Issue includes, but is not limited to, the following topics:

- Data-driven algorithms based on IoT-system-generated data;
- Applications of transfer learning for image processing;
- Object detection using machine learning;
- Feature selection techniques;
- IoT-based applications with data analysis;
- Real-world applications of machine learning.

About the Journal

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus /
SciFinder, Inspec, Ei Compendex and other databases.

Journal Rank:

JCR - Q2 (Engineering, Electrical and Electronic) /
CiteScore - Q1 (Electrical and Electronic Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.8 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
