

## Special Issue

# Deep Learning Algorithm Generalization for Complex Industrial Systems

### Message from the Guest Editors

This Special Issue aims to provide a forum for researchers and practitioners to discuss and exchange recent advances, research results, and emerging research directions in Deep Learning Algorithm Generalization for Complex Industrial System, specifically in an environment of smart technologies such as artificial intelligence, big data, and so on. Hopefully, we can develop some new modeling and simulation methodologies to support the challenges of complex industrial systems, such as changes, adaptation, change, and innovativeness. This Special Issue covers a variety of contributions from different fields.

## About the Journal

### Message from the Editor-in-Chief

*Electronics* is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guestedited by leading experts in selected topics of interest.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, Ei Compendex and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Electrical and Electronic) /  
CiteScore - Q1 (Electrical and Electronic Engineering)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.4 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the second half of 2025).
