

## Special Issue

# New Insights in Semiconductors: Materials, Devices, and Applications

### Message from the Guest Editor

To further increase the application potential of nitride LEDs, the use of other regions of the electromagnetic spectrum is highly desirable, and current research activity is particularly focused on two topics: (1) green and red LEDs as compact light sources in the visible wavelength range and (2) UVB and UVC LEDs as compact light sources in the ultra-violet (UV) wavelength range. In both cases, the improvement of LED efficiency is based on developing innovative routes from material growth to the device fabrication process.

We are interested in receiving manuscripts about far-UVC LED module technology, UVB LED module technology, HEMT, power devices, transistors, electronic sensors etc., using p-GaN, AlGaN, BN, SiC, diamond, and Ga<sub>2</sub>O<sub>3</sub>.

## About the Journal

### Message from the Editor-in-Chief

*Electronics* is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guestedited by leading experts in selected topics of interest.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus /  
SciFinder, Inspec, Ei Compendex and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Electrical and Electronic) /  
CiteScore - Q1 (Electrical and Electronic Engineering)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is  
provided to authors approximately 16.8 days after  
submission; acceptance to publication is undertaken in 2.4  
days (median values for papers published in this journal in  
the first half of 2025).
