

## Special Issue

# Advances in Information Processing and Network Security

### Message from the Guest Editors

With the rapid advancement of information technology and artificial intelligence, an increasing number of individuals are gaining access to the Internet, bringing heightened attention to issues related to information processing and network security. Information processing techniques, such as information gathering, information storage, data mining, and information transmission, are being widely adopted. These techniques enable more efficient information analysis and decision-making across various domains. Furthermore, the growing complexity of modern network environments has led to an increasing need for advanced network security measures to protect sensitive information from cyber threats and privacy violations. For instance, in social networks, information processing technologies can identify and predict user behavior, detect anomalies, and visualize interactions to better understand social patterns, but during the information processing process, it is also necessary to pay attention to protecting user privacy and network attacks. Concurrently, advancements in network security are crucial in safeguarding data and ensuring privacy protection.

## About the Journal

### Message from the Editor-in-Chief

*Electronics* is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guestedited by leading experts in selected topics of interest.

### Editor-in-Chief

Prof. Dr. Flavio Canavero

Department of Electronics and Telecommunications, Politecnico di Torino, 10129 Torino, Italy

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, Ei Compendex and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Electrical and Electronic) /  
CiteScore - Q1 (Electrical and Electronic Engineering)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.4 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the second half of 2025).
