

## Special Issue

# Electronic Devices and Technology for Educational Applications

### Message from the Guest Editors

Today's society is conditioned by the constant influence of technology. This situation has a direct impact on the field of education. At present, a large number of electronic resources are being used in learning environments, fostering students' learning. In this sense, technology provides numerous benefits for training activities. Studies reveal that resources such as robotics, STEM projects, and any other technology lead to various improvements in the process of building knowledge by students. With this Special Issue we encourage the scientific community to submit research or review papers related to new ways of teaching and learning through technology and electronics.

## About the Journal

### Message from the Editor-in-Chief

*Electronics* is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPus /  
SciFinder, Inspec, Ei Compendex and other databases.

#### Journal Rank:

JCR - Q2 (Physics, Applied) / CiteScore - Q2 (Control and  
Systems Engineering)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is  
provided to authors approximately 16.4 days after  
submission; acceptance to publication is undertaken in 2.4  
days (median values for papers published in this journal in  
the second half of 2024).
