Enabling Technologies in Electric and More Electric Transportation

Message from the Guest Editors

In recent years, electric vehicles (EVs), hybrid EVs and electric transportation systems have been rapidly developed, and more and more broadly used in the world. This Special Issue is focused on the recent advances and developments in key technologies and solutions used for EVs, hybrid EVs, electric transportation systems, and related applications. All relevant research and review papers of analysis, design, simulation, evaluation and/or experiment are welcomed to contribute to the Special Issue.

About the Journal

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPus /
SciFinder, Inspec, Ei Compendex and other databases.

Journal Rank:

JCR - Q2 (Physics, Applied) / CiteScore - Q2 (Control and
Systems Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 16.4 days after
submission; acceptance to publication is undertaken in 2.4
days (median values for papers published in this journal in
the second half of 2024).
