

Special Issue

Recent FPGA Architectures and Applications

Message from the Guest Editors

FPGAs are currently involved in a continuous update of characteristics and features, thus becoming the technology of choice for many final designs, with new fields of application arising. As a consequence, low-cost FPGAs are increasing the number of logic elements while reducing power consumption, becoming a valid option for IoT applications requiring high performance and/or high levels of security. On the other hand, the latest generations of high-performance FPGAs include embedded processors and high-speed memories within the same device, opening up new possibilities in the development of hardware accelerators, AI applications, database servers, and so on. This Special Issue, entitled “Recent FPGA Architectures and Applications”, is intended to present the latest advances in applications benefiting from new FPGA architectures and features, new applications of low-cost FPGAs to fields such as IoT or digital control, and the emerging applications of high-performance FPGAs to AI, high-performance servers, and hardware-accelerated systems.

About the Journal

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

Editor-in-Chief

Prof. Dr. Flavio Canavero

Department of Electronics and Telecommunications, Politecnico di
Torino, 10129 Torino, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPus /
SciFinder, Inspec, Ei Compendex and other databases.

Journal Rank:

JCR - Q2 (Engineering, Electrical and Electronic) /
CiteScore - Q1 (Electrical and Electronic Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 16.8 days after
submission; acceptance to publication is undertaken in 2.4
days (median values for papers published in this journal in
the first half of 2025).
