

Special Issue

Emerging Applications of Recent FPGA Architectures

Message from the Guest Editors

Nowadays there is a wide typology of FPGAs, from small and low-power devices with application to IoT solutions, to the new high-performance, high-density FPGAs including embedded microprocessors, high-speed memory and high-bandwidth communications. This broad range of devices is leading to multiple applications, such as IoT systems, power control, hardware acceleration, cryptography, communications, high-performance computing, and so on. This special issue is intended to present the latest advances in applications benefiting from new FPGA architectures and features, and to illustrate the wide range of applications where FPGAs can offer a competitive, if not the best, design option. The topics to be covered in this Special Issue are as follows:

- FPGA Architecture
- FPGA Application
- Programmable Logic Devices
- System on Chip
- Hardware acceleration
- Embedded microprocessor
- Digital power control using FPGAs
- Cryptographic applications using FPGAs
- High-performance computing
- IoT systems based on FPGAs.

About the Journal

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guestedited by leading experts in selected topics of interest.

Editor-in-Chief

Prof. Dr. Flavio Canavero

Department of Electronics and Telecommunications, Politecnico di Torino, 10129 Torino, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, Ei Compendex and other databases.

Journal Rank:

JCR - Q2 (Engineering, Electrical and Electronic) /
CiteScore - Q1 (Electrical and Electronic Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.4 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the second half of 2025).
