

## Special Issue

# Fault-Tolerant Digital Circuits: Protection Techniques, CAD Tools and Emerging Applications

### Message from the Guest Editor

Reliability is a growing concern for electronic digital circuits. In this Special Issue, we are interested in exploring new protection techniques for electronic systems, CAD tools to perform reliability tests and novel applications, in different fields, which can benefit from the use of fault-tolerant circuits. These topics include but not limited to:

- New protection techniques for digital circuits
- Fault-tolerant computer architectures
- Error correction codes (ECC) to increase reliability in innovative ways
- Signal and image processing systems with a focus on reliability
- CAD tools and methods to emulate error injection test processes
- Novel applications of fault tolerant digital circuits

Welcome to contribute.

## About the Journal

### Message from the Editor-in-Chief

*Electronics* is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guestedited by leading experts in selected topics of interest.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, Ei Compendex and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Electrical and Electronic) /  
CiteScore - Q1 (Electrical and Electronic Engineering)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.4 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the second half of 2025).
