

## Special Issue

# Flexible Wearable Microwave Devices: Design and Applications

### Message from the Guest Editors

Dear colleagues, Wireless body area networks (WBANs) provide a consistent interconnection between various body-centric devices for communication and sensing. Researchers are looking for flexible devices with high radiation efficiency, compact size, wide bandwidth, high gain, low complexity, and robust impedance matching requirements. These devices must be compatible with clothing with a consistent performance under bending and human proximity effects, which comply with specific absorption rate (SAR) restrictions. This Special Issue aims to publish novel ideas for fabrication and new methods to design microwave devices for wearable technology. In this Special Issue, original research articles and reviews are welcome. We request researchers, engineers, and scientists to contribute their peer review research which explains research gaps including, but not limited to:

- Wearable antennas and sensors for healthcare;
- Body area networks;
- Flexible antennas;
- Reconfigurable antennas;
- Fabrication technology for wearable microwave devices;
- Textile sensors;
- Stretchable microwave devices.

## About the Journal

### Message from the Editor-in-Chief

*Electronics* is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guestedited by leading experts in selected topics of interest.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus /  
SciFinder, Inspec, Ei Compendex and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Electrical and Electronic) /  
CiteScore - Q1 (Electrical and Electronic Engineering)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is  
provided to authors approximately 16.8 days after  
submission; acceptance to publication is undertaken in 2.4  
days (median values for papers published in this journal in  
the first half of 2025).
