System-on-Chip (SoC) and Field-Programmable Gate Array (FPGA) Design

Message from the Guest Editor

The evolution of digital technology is firmly steered by key concepts such as field-programmable gate arrays (FPGAs) and the evolution of system-on-chip (SoC). These pivotal elements seamlessly integrate programmable logic, creating a potent synergy that manifests in spatial and temporal computing. While SoCs stand as a milestone in technological evolution, incorporating processors and reconfigurable logic areas, FPGAs emerge as fundamental devices for the rapid development of complex digital circuits. Together, SoCs and FPGAs create an ecosystem that not only accelerates the time to market but also opens the doors to a new computing paradigm, where flexibility and spatial-temporal optimization are at the forefront of digital innovation. The significance of these FPGA and SoC architectures extends beyond mere computing power, influencing the design of advanced devices in sectors such as artificial intelligence, the Internet of Things, and robotics, radically transforming how we interact with technology in our daily lives.

About the Journal

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guestedited by leading experts in selected topics of interest.

Editor-in-Chief

Prof. Dr. Flavio Canavero

Department of Electronics and Telecommunications, Politecnico di
Torino, 10129 Torino, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus /
SciFinder, Inspec, Ei Compendex and other databases.

Journal Rank:

JCR - Q2 (Engineering, Electrical and Electronic) /
CiteScore - Q1 (Electrical and Electronic Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 16.8 days after
submission; acceptance to publication is undertaken in 2.4
days (median values for papers published in this journal in
the first half of 2025).
