

## Special Issue

# Guidance, Navigation, and Fault-Tolerant Control of Autonomous Systems

### Message from the Guest Editors

The Special Issue aims to discuss state-of-the-art operational approaches for autonomous platforms, where the potential topics include, but are not limited to:

- Guidance, navigation, and control for nonlinear systems
- System health assessment, monitoring, and adaptive operations
- Multi-robot-system operations for collaborative tasks
- Collision-free dynamic path-planning in uncertain environments
- Fault detection, isolation, and reconfigurable system design
- Fault-tolerant control system design
- Static and dynamic property estimation for autonomous systems
- New autonomous platform design and development
- Positioning, localization, and tracking system

Welcome to contribute!

## About the Journal

### Message from the Editor-in-Chief

*Electronics* is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPus /  
SciFinder, Inspec, Ei Compendex and other databases.

#### Journal Rank:

JCR - Q2 (Physics, Applied) / CiteScore - Q2 (Control and  
Systems Engineering)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is  
provided to authors approximately 16.4 days after  
submission; acceptance to publication is undertaken in 2.4  
days (median values for papers published in this journal in  
the second half of 2024).
