

Special Issue

Wireless Multimodal Communications for Integrated Heterogeneous Networks

Message from the Guest Editors

This work focuses on multimodal communication advancements in vertical domains (e.g., power systems, aerospace, marine development), aiming to advance dynamic reconfiguration of smart grids, space-air-ground intelligent communication control, and autonomous coordination in UAV self-organizing networks. By developing software-defined radio (SDR)-compatible platforms with intelligent reflecting surfaces (IRS) and hybrid multimodal wireless transmission, we accelerate the engineering application of multimodal technologies in strategic areas such as next-generation power systems, low-altitude economy, and deep-space exploration.

About the Journal

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

Editor-in-Chief

Prof. Dr. Flavio Canavero

Department of Electronics and Telecommunications, Politecnico di
Torino, 10129 Torino, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus /
SciFinder, Inspec, Ei Compendex and other databases.

Journal Rank:

JCR - Q2 (Engineering, Electrical and Electronic) /
CiteScore - Q1 (Electrical and Electronic Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 16.8 days after
submission; acceptance to publication is undertaken in 2.4
days (median values for papers published in this journal in
the first half of 2025).
