

Special Issue

Human Robot Interaction: Techniques, Applications, and Future Trends

Message from the Guest Editors

This Special Issue in the *Electronics* journal aims to bring together the latest research and applications in the field of HRI, focusing on emerging techniques, concrete implementations, and future development directions. Contributions that address the technical, social, and ethical aspects of human robot interaction and propose creative solutions, demonstrative platforms, or relevant case studies are encouraged. The topics of interest include, but are not limited to, the following:

- Machine learning and artificial intelligence algorithms for human–robot collaboration;
- Multimodal interaction methods (speech, gestures, gaze, and haptic feedback);
- Recognition of emotions and adaptive behaviors in robots;
- Human factors and ergonomics in HRI interface design;
- Social and assistive robotics for health, therapy, and elderly care;
- Educational robots and platforms for collaborative learning;
- Trust, ethics, and transparency in interaction with robots;
- Augmented and virtual reality in HRI systems;
- The safety and reliability of robots near humans;
- Future trends and emerging applications of HRI in smart environments.

About the Journal

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guestedited by leading experts in selected topics of interest.

Editor-in-Chief

Prof. Dr. Flavio Canavero

Department of Electronics and Telecommunications, Politecnico di
Torino, 10129 Torino, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus /
SciFinder, Inspec, Ei Compendex and other databases.

Journal Rank:

JCR - Q2 (Engineering, Electrical and Electronic) /
CiteScore - Q1 (Electrical and Electronic Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 16.8 days after
submission; acceptance to publication is undertaken in 2.4
days (median values for papers published in this journal in
the first half of 2025).
