

## Special Issue

# High Performance Power Converters: Design, Control, Devices and Applications

### Message from the Guest Editors

Optimal design, topologies, and control algorithms for improving of the efficiency of power converters have been actively developed and regarded as the core technology in various industry applications, such as home appliances, electric vehicles, renewable energies, energy storage systems, and so on. With the help of wide bandgap (WBG) power semiconductor devices such as SiC and GaN devices, in recent times, the dramatic improvement of efficiency of power converters has become the main issue. Therefore, this Special Issue focuses on emerging technologies to meet the recent requirements of power converters for various industry applications. Topics of primary interest include but are not limited to the following:

- Topologies and control methods for high efficiency;
- Optimal design approaches for high efficiency;
- Power converters based on wide bandgap devices;
- Passive component design for efficiency improvement;
- Soft-switching methods for power converters.

---

### Guest Editors

Prof. Dr. Jae-Jung Yun

School of Electrical Engineering, Chungbuk National University,  
Cheongju, Republic of Korea

Prof. Dr. Jong-Soo Kim

School of Electrical Engineering, Daejin University, Pocheon, Korea

---

### Deadline for manuscript submissions

closed (31 January 2022)

## About the Journal

### Message from the Editor-in-Chief

*Electronics* is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPus /  
SciFinder, Inspec, Ei Compendex and other databases.

#### Journal Rank:

JCR - Q2 (Physics, Applied) / CiteScore - Q2 (Control and  
Systems Engineering)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is  
provided to authors approximately 16.4 days after  
submission; acceptance to publication is undertaken in 2.4  
days (median values for papers published in this journal in  
the second half of 2024).
