## Intelligence/Security Embedded IoT Systems

### Message from the Guest Editors

The pervasiveness of IoT technologies in a variety of fields is changing our lives. Industry, agriculture, health, and even personal life are experiencing a revolution in the way data are collected, communicated, processed, and stored. This Special Issue aims to promote discussions of research and relevant activities in the models and design of secure, privacy-preserving, or trust architectures, data analyses, and fusion platforms, protocols, algorithms, services, and applications for next-generation IoT systems. This Special Issue invites researchers to contribute with original contributions, case studies, and reviews that address all new challenges due to the use of IoT in synergy with security and privacy-preserving techniques and/or machine learning techniques.
