

Special Issue

Recent Advances in Intelligent Transportation Systems, 2nd Edition

Message from the Guest Editors

Information technology is tightly linked with intelligent transportation systems, and some of these related technologies include wireless communication, computational technologies, floating car data/floating cellular data, sensing technologies, and video vehicle detection; intelligent transportation systems technologies include theoretical and application topics such as emergency vehicle notification systems, automatic road enforcement, collision avoidance systems, and some cooperative navigation systems. Transportation systems can involve humans, vehicles, shipments, information technology, and the physical infrastructure, all interacting in complex ways. Many aspects of transportation systems are uncertain, dynamic, and nonlinear, and such systems may be highly sensitive to perturbations. Controls can involve multiple distributed and hierarchical agents. Humans who invariably play critical roles in transportation systems have a diversity of objectives and a wide range of skills and education. Transportation systems are usually large scale in nature and are invariably geographically distributed.

About the Journal

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guestedited by leading experts in selected topics of interest.

Editor-in-Chief

Prof. Dr. Flavio Canavero

Department of Electronics and Telecommunications, Politecnico di Torino, 10129 Torino, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, Ei Compendex and other databases.

Journal Rank:

JCR - Q2 (Engineering, Electrical and Electronic) /
CiteScore - Q1 (Electrical and Electronic Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.4 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the second half of 2025).
