Special Issue

IoT Sensor Network Application

Message from the Guest Editors

Ubiquitous sensor networks (USNs) with various resource-limited devices have the capability of sensing, collecting, and disseminating data in many different real life applications. In recent years, autonomous cars and UAVs are attracting great interest as IoT devices due to their marketability and industrial impact. The importance of sensors and networks is increasing in the unmanned transfer vehicle IoT system that provides control and services data. These data are generated during collecting and processing large amounts of sensor data of autonomous cars and UAVs in real-time. IoT sensor network applications contribute to the significant research advances in the following areas such as ubiquitous and context-aware computing, USN location awareness services, protocols and algorithms of USN, sensor data processing, management and control of USN, IoT architectures, IoT network applications, etc. Please click here to find information!

Welcome to contribute!

About the Journal

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guestedited by leading experts in selected topics of interest.

Editor-in-Chief

Prof. Dr. Flavio Canavero
Department of Electronics and Telecommunications, Politecnico di Torino, 10129 Torino, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, Ei Compendex and other databases.

Journal Rank:

JCR - Q2 (Engineering, Electrical and Electronic) / CiteScore - Q1 (Electrical and Electronic Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.8 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
