Superconductor Electronics and Its Applications

Message from the Guest Editor

This Special Issue aims to cover the recent research developments in superconductor electronics and its applications; in this regard, we propose the following topics:

- Experimental effort to search for high T_c superconducting materials
- Theoretical prediction of new superconducting materials
- Understanding the mechanism for unconventional superconductivity
- Exotic phase diagram of high T_c superconductors
- Low-dimensional/interface superconductors
- Low-consumption electronics basing on superconductors

About the Journal

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus /
SciFinder, Inspec, Ei Compendex and other databases.

Journal Rank:

JCR - Q2 (Engineering, Electrical and Electronic) /
CiteScore - Q1 (Electrical and Electronic Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.8 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
