

## Special Issue

# Exploring Artificial-Intelligence-Generated Content: Research on Content Creation, Evaluation and Humans-in-the-Loop

### Message from the Guest Editors

In the swiftly evolving landscape of digital content, artificial-intelligence-generated content (AIGC) stands at the forefront, driving a transformative wave across various media. This Special Issue is dedicated to exploring the multifaceted dimensions of AIGC, encompassing content generation and evaluation and the intricate role of humans in the loop. We will provide a comprehensive platform for researchers, practitioners, and enthusiasts to delve into the latest breakthroughs, methodologies, and applications within the realm of AIGC. AIGC has revolutionized the way that we create and consume content, leveraging advanced AI algorithms to produce text, images, audio, and video autonomously. This Special Issue focuses on three critical areas of AIGC: the methodologies and innovations in content generation, the frameworks and metrics for content evaluation, and the dynamic interplay between humans and AI in content creation and adjustment processes. In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following: **AIGC Content Generation AIGC Content Evaluation Humans-in-the-Loop (HITL) in AIGC**

### Guest Editors

Dr. Xingjiao Wu

## About the Journal

### Message from the Editor-in-Chief

*Electronics* is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guestedited by leading experts in selected topics of interest.

---

### Editor-in-Chief

Prof. Dr. Flavio Canavero

Department of Electronics and Telecommunications, Politecnico di  
Torino, 10129 Torino, Italy

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus /  
SciFinder, Inspec, Ei Compendex and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Electrical and Electronic) /  
CiteScore - Q1 (Electrical and Electronic Engineering)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is  
provided to authors approximately 16.8 days after  
submission; acceptance to publication is undertaken in 2.4  
days (median values for papers published in this journal in  
the first half of 2025).
