

## Special Issue

# Recent Advance of Computing Power Networks at the Edge

### Message from the Guest Editors

In the era of the Internet of Everything, the surge in computing demands is presenting significant challenges. The conventional architecture of cloud computing falls short in terms of meeting the stringent requirements of latency, bandwidth, security, and privacy for massive data processing. As the number of endpoint devices continues to grow, the migration of cloud computing tasks, to the edge has emerged as a pivotal technological trend. Nevertheless, edge computing resources are inherently constrained and costly compared to their cloud counterparts. Consequently, exploring the possibilities to establish a cost-effective, efficient, and resilient computing power network at the edge of interest as a research topic. Potential submission themes include, but are not limited to, the following areas:

- Communication infrastructure for computing power networks at the edge;
- Programming models and toolkits for computing power networks at the edge;
- AI services on the edge;
- Emerging applications at the edge;
- Resource management for computing power networks at the edge;
- Security and privacy issues of computing power networks at the edge.

### Guest Editors

Prof. Dr. Yi Gao

College of Computer Science and Technology, Zhejiang University, Hangzhou 310027, China

Dr. Jiamei Lv

School of Software Technology, Zhejiang University, Ningbo 315048, China

### Deadline for manuscript submissions

closed (15 July 2024)

## About the Journal

### Message from the Editor-in-Chief

*Electronics* is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guestedited by leading experts in selected topics of interest.

---

### Editor-in-Chief

Prof. Dr. Flavio Canavero

Department of Electronics and Telecommunications, Politecnico di  
Torino, 10129 Torino, Italy

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus /  
SciFinder, Inspec, Ei Compendex and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Electrical and Electronic) /  
CiteScore - Q1 (Electrical and Electronic Engineering)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is  
provided to authors approximately 16.8 days after  
submission; acceptance to publication is undertaken in 2.4  
days (median values for papers published in this journal in  
the first half of 2025).
