

## Special Issue

# From Pixels to Perception: Machine Generation of High- Quality Vision and Multi-Modal Data

### Message from the Guest Editors

- Leveraging advanced machine learning and deep learning techniques to transform basic pixel information into high-quality visual content and multi-modal data is current research topic of significant interest. This process primarily involves the generation and processing of images, where machines can extract meaningful features from low-level pixel data and then utilize these features for more complex perception tasks. Furthermore, by integrating audio and text information, rich multi-modal datasets can be generated.
- The goal of this Special Issue is to present the recent advances in machine learning/deep learning-based data generation techniques and their applications in intelligent systems. Authors are welcome to submit research papers, as well as literature reviews, related to image/video generation, and their applications in virtual reality and augmented reality, autonomous driving, film production, art and creative design, medical imaging, etc.

### Guest Editors

Dr. Hongping Gan

School of Software, Northwestern Polytechnical University (NPU), Xi'an 710129, China

Dr. Honggang Chen

College of Electronics and Information Engineering, Sichuan University, Chengdu 610065, China

### Deadline for manuscript submissions

15 July 2025

## About the Journal

### Message from the Editor-in-Chief

*Electronics* is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

---

### Editor-in-Chief

Prof. Dr. Flavio Canavero

Department of Electronics and Telecommunications, Politecnico di  
Torino, 10129 Torino, Italy

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPus /  
SciFinder, Inspec, Ei Compendex and other databases.

#### Journal Rank:

JCR - Q2 (Physics, Applied) / CiteScore - Q2 (Control and  
Systems Engineering)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is  
provided to authors approximately 16.4 days after  
submission; acceptance to publication is undertaken in 2.4  
days (median values for papers published in this journal in  
the second half of 2024).
