

## Special Issue

# Cryptography in Network Security

### Message from the Guest Editors

Cryptography is the basic theory of network security and mainly provides security services such as confidentiality, integrity, and availability for information systems. In actual cryptographic applications, common problems include key leaks, implementation loopholes in cryptographic algorithms and protocols, and privacy leaks. Particularly in new environments such as the Internet of Things, the Industrial Internet, and the Internet of Vehicles, special research is needed to adapt the theory and technology of cryptography. This Special Issue invites the submission of both original research articles and reviews. Research areas may include (but are not limited to) the following topics:

- cryptographic algorithm design
- applied cryptography
- cryptographic protocol analysis
- emerging cryptographic techniques
- vulnerability mining and exploitation in cryptography applications
- authentication and biometric security/privacy
- blockchain security/privacy
- Internet of Things, the Industrial Internet, and the Internet of Vehicles security/privacy
- security/privacy of systems based on ML and AI

We look forward to receiving your contributions.

## About the Journal

### Message from the Editor-in-Chief

*Electronics* is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guestedited by leading experts in selected topics of interest.

### Editor-in-Chief

Prof. Dr. Flavio Canavero

Department of Electronics and Telecommunications, Politecnico di  
Torino, 10129 Torino, Italy

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus /  
SciFinder, Inspec, Ei Compendex and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Electrical and Electronic) /  
CiteScore - Q1 (Electrical and Electronic Engineering)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is  
provided to authors approximately 16.8 days after  
submission; acceptance to publication is undertaken in 2.4  
days (median values for papers published in this journal in  
the first half of 2025).
