

Special Issue

Power Electronics Technology for Industrial 5.0

Message from the Guest Editors

In Industry 5.0, particularly within an electronic context, it is expected that systems can collaborate with humans in order to increase their wealth, which includes the development of sustainable practices, to promote sustainability within the industry in general. Power electronics technology, for instance, has achieved considerable progress after several decades of the evolution of power converters, electrical machines, motor drives, and advanced control techniques, playing, therefore, a significant role to promote sustainability in society. This Special Issue aims to gather the latest developments, concerning these challenges.

- Soft computing approaches to produce electronic products for renewable energy systems
- Collaborative ecosystems in the electronics industry to design green products
- Neural network's-based on power electronic products are designed for the energy efficiency sector
- AI's based approaches to improve industry's process manufactory
- Integration of energy storage systems with renewable energy generation in smart grids
- Novel topologies of power electronic converters adopted for sustainable power systems

Guest Editors

Prof. Dr. Joaquim Monteiro

INESC-ID, Instituto Superior de Engenharia de Lisboa (ISEL) of the Polytechnic Institute of Lisbon, 1959-007 Lisbon, Portugal

Dr. Ricardo Simões Santos

GOVCOPP, Campus Universitário de Santiago, University of Aveiro, 3810-193 Aveiro, Portugal

About the Journal

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

Editor-in-Chief

Prof. Dr. Flavio Canavero

Department of Electronics and Telecommunications, Politecnico di
Torino, 10129 Torino, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPus /
SciFinder, Inspec, Ei Compendex and other databases.

Journal Rank:

JCR - Q2 (Engineering, Electrical and Electronic) /
CiteScore - Q1 (Electrical and Electronic Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 16.8 days after
submission; acceptance to publication is undertaken in 2.4
days (median values for papers published in this journal in
the first half of 2025).
