

Special Issue

Situational Awareness and Protection Technologies for Low-Carbon Economic Operation of New Power Systems

Message from the Guest Editors

With the challenges associated with global climate change, the "low-carbon economy" based on low energy consumption, low pollution and low emissions has become a frequently debated topic at a global scale, which places a further emphasis on the need to develop higher requirements for the safe operation of power system. This Special Issue focuses on the development of state estimation, situational awareness and protection technologies of power systems. It aims to lay a foundation for the low-carbon economic and safe operation of new power systems. More information could be found at:

About the Journal

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

Editor-in-Chief

Prof. Dr. Flavio Canavero

Department of Electronics and Telecommunications, Politecnico di
Torino, 10129 Torino, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus /
SciFinder, Inspec, Ei Compendex and other databases.

Journal Rank:

JCR - Q2 (Engineering, Electrical and Electronic) /
CiteScore - Q1 (Electrical and Electronic Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 16.8 days after
submission; acceptance to publication is undertaken in 2.4
days (median values for papers published in this journal in
the first half of 2025).
