

## Special Issue

# Medical Image Analysis and Computer Vision

### Message from the Guest Editors

The aim of this Special Issue of Electronics is to present state-of-the-art methods used to analyse and process medical images through computer vision techniques. We invite researchers to contribute original and unique articles, as well as sophisticated review articles. The topics of interest include but are not limited to:

- Medical image enhancement
- Medical image restoration
- Object detection in medical images
- Medical image classification
- 2D/3D medical image segmentation
- 2D/3D medical image registration
- Computational medical imaging
- Machine learning/deep learning for medical imaging
- Geometric data processing in medical imaging
- Image fusion

## About the Journal

### Message from the Editor-in-Chief

*Electronics* is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guestedited by leading experts in selected topics of interest.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus /  
SciFinder, Inspec, Ei Compendex and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Electrical and Electronic) /  
CiteScore - Q1 (Electrical and Electronic Engineering)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is  
provided to authors approximately 16.8 days after  
submission; acceptance to publication is undertaken in 2.4  
days (median values for papers published in this journal in  
the first half of 2025).
