# **Special Issue**

# Massive MIMO Technology for 5G and Beyond

## Message from the Guest Editors

The main aim of this Special Issue is to seek new theories in massive MIMO, including channel characteristics, performance analysis, and optimization methods. The topics of interest include, but are not limited to:

- Channel measurements and modeling in massive MIMO system;
- Novel channel characteristics for massive MIMO system, i.e., non-stationary property, channel sparsity in time and spatial domain;
- Theoretical performance analysis for massive MIMO system;
- Application of massive MIMO system in novel scenarios, i.e., aerial vehicles, massive connectivity, ultra low-latency communications, and ultra-reliable communications;
- Advanced and low-complexity massive MIMO enabling transmission technique design, i.e., channel estimation, hybrid-beamforming, MU-MIMO, and cellfree deployments;
- Joint MIMO transceiver design;
- New paradigm of massive MIMO system, i.e., reconfigurable intelligent surface (RIS), holographic MIMO;
- New mathematical methods of signal processing for massive MIMO system;
- Artificial Intelligence applications of robust massive MIMO system design.

## **Guest Editors**

Prof. Dr. Jianhua Zhang

Dr. Yuxiang Zhang

Prof. Dr. Jiayi Zhang

Dr. Zhimeng Zhong

Dr. Jianwu Dou

Dr. Tao Jiang

# About the Journal

#### Message from the Editor-in-Chief

*Electronics* is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

#### Editor-in-Chief

Prof. Dr. Flavio Canavero Department of Electronics and Telecommunications, Politecnico di Torino, 10129 Torino, Italy

#### **Author Benefits**

#### **High Visibility:**

indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, Ei Compendex and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Electrical and Electronic) / CiteScore - Q1 (Electrical and Electronic Engineering)

#### **Rapid Publication:**

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.8 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
