

## Special Issue

# Machine Learning and Deep Learning for Biosignals Interpretation

### Message from the Guest Editors

This Special Issue aims to collect relevant research advancements biosignal processing and information/knowledge extraction from biosignals based on machine learning and deep learning, as well as to report the design and development of novel systems that use biosignals and ML/DL to address specific application scenarios, which include, but are not limited to: Analysis of human movements; Emotion detection and classification; Health status monitoring; Support for diagnosis and therapy management of pathologies; Assistive devices; Human–computer interaction. In the context of this Special Issue, relevant classes of biosignals include the following: Bioelectrical signals generated by nerves and muscle cells; Biomagnetic signals associated with specific physiological activity typically linked to an accompanying electric field from a specific tissue or organ; Biomechanical signals describing mechanical functions of biological systems including motion, displacement, tension, force, pressure and flow, production of measurable biological signals; Biochemical signals containing information about changes in concentration of chemical agents in the body.

### Guest Editors

Prof. Dr. Christian Morbidoni  
Prof. Dr. Francesco Di Nardo  
Prof. Dr. Alessandro Cucchiarelli

### Deadline for manuscript submissions

closed (30 June 2022)

## About the Journal

### Message from the Editor-in-Chief

*Electronics* is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guestedited by leading experts in selected topics of interest.

### Editor-in-Chief

Prof. Dr. Flavio Canavero

Department of Electronics and Telecommunications, Politecnico di Torino, 10129 Torino, Italy

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, Ei Compendex and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Electrical and Electronic) /  
CiteScore - Q1 (Electrical and Electronic Engineering)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.4 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the second half of 2025).
