

Special Issue

Millimeter-Wave Integrated Circuits and Systems for 5G Applications, Volume II

Message from the Guest Editors

The main aim of this Special Issue is to disseminate the latest findings, new research developments, and future trends and innovations in MMW integrated circuits and systems for 5G applications. Regarding Volume I, please refer to the following link

(https://www.mdpi.com/journal/electronics/special_issues/MMwave_circuit). The papers considered for possible publication may focus on but are not necessarily limited to the following areas:

- MMW circuits, such as low-noise amplifiers, mixers, voltage-controlled oscillators, power amplifiers, variable gain amplifiers, etc.;
- MMW architectures, systems and subsystems, such as receivers, transmitters, transceivers, phase-locked loops, frequency synthesizers, multistandard transceivers, digital radio, etc.;
- MMW passive structures such as transformers, hybrid couplers, filters, baluns, switches, antennas, etc.;
- MMW digital baseband; MMW data converters; wireless communication systems; wideband integrated circuits and systems; low-power and energy-efficient MMW digital systems;
- Advanced MMW ICs; emerging MMW nanoscale CMOS ICs; MMW 3D integrations; MMW SiP and SOC.

Please click [here](#) to find information! Welcome to contribute!

About the Journal

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

Editor-in-Chief

Prof. Dr. Flavio Canavero

Department of Electronics and Telecommunications, Politecnico di
Torino, 10129 Torino, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPus /
SciFinder, Inspec, Ei Compendex and other databases.

Journal Rank:

JCR - Q2 (Physics, Applied) / CiteScore - Q2 (Control and
Systems Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 16.4 days after
submission; acceptance to publication is undertaken in 2.4
days (median values for papers published in this journal in
the second half of 2024).
