Special Issue

Millimeter-Wave Integrated Circuits and Systems for 5G Applications

Message from the Guest Editor

The main aim of this Special Issue is to disseminate latest findings, new research developments, and future trends and innovations in MMW integrated circuits and systems for 5G applications. Both theoretical and experimental studies for MMW IC design, architectures, technologies, devices, circuits, and systems are encouraged. The papers considered for possible publication may focus on but not necessarily be limited to the following areas:

- MMW circuits, such as low noise amplifiers, mixers, voltage-controlled oscillators, power amplifiers, variable gain amplifiers, etc.;
- MMW architectures, systems and subsystems, such as receivers, transmitters, transceivers, phase-locked loops, frequency synthesizers, multistandard transceivers, digital radio, etc.;
- MMW passive structures such as transformers, hybrid couplers, filters, baluns, switches, antennae, etc.;
- MMW digital baseband; MMW data converters; wireless communication systems; wideband integrated circuits and systems; low-power and energy-efficient MMW digital systems;
- Advanced MMW IC; emerging MMW nanoscale CMOS IC; MMW 3D integrations; MMW SiP and SOC.

About the Journal

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guestedited by leading experts in selected topics of interest.

Editor-in-Chief

Prof. Dr. Flavio Canavero
Department of Electronics and Telecommunications, Politecnico di Torino, 10129 Torino, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, Ei Compendex and other databases.

Journal Rank:

JCR - Q2 (Engineering, Electrical and Electronic) / CiteScore - Q1 (Electrical and Electronic Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.8 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
