

Special Issue

Mechatronic Control Engineering

Message from the Guest Editors

The current Special Issue primarily represents a collection of extended versions of selected papers presented at the 23rd International Conference for Fluid Power and Mechatronic Control Engineering (ICFPMCE). We invite the submissions of papers with a more general research approach to or review articles on all aspects concerning Industrial Electronics and System and Control Engineering. The topics of interest include, but are not limited to, the following:

- Industrial electronics;
- Power electronics;
- System and control engineering;
- Artificial intelligence;
- Electrical and autonomous vehicles;
- Sensors and systems;
- Machine learning;
- Life-cycle assessment and the circular economy;
- Computer science and engineering;
- Microfluidics.

About the Journal

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guestedited by leading experts in selected topics of interest.

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, Ei Compendex and other databases.

Journal Rank:

JCR - Q2 (Engineering, Electrical and Electronic) /
CiteScore - Q1 (Signal Processing)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.8 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2026).
