

Special Issue

Mixed Signal Circuit Design

Message from the Guest Editors

Today, high-performance and energy-efficient electronic devices are mainly based on mixed-signal integrated circuits (ICs) that handle both analog and digital signal processing. Mixed-signal ICs containing both analog circuits and digital circuits are typically cost-effective solutions for building high-speed and low-power electronic systems. Recently, the complexity of mixed-signal design is getting further exacerbated in heterogeneous integration of different dies for three-dimensional (3D) ICs. The importance of mixed-signal design in next-generation system-on-chip (SoC) systems is ever increasing. This Special Issue focuses on advance analog, RF, and mixed-signal circuit designs. The topics of primary research include, but are not limited to, the following: High-speed I/O circuits; Advanced clocking circuits; Data converters: ADCs and DACs; Integrated sensor ICs; Internet of Things (IoT) applications; Low-power and low-voltage circuits; RF circuits and building blocks; Heterogeneous integration circuits and systems; Power management integrated circuits (PMICs); Signal integrity and power integrity techniques.

About the Journal

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

Editor-in-Chief

Prof. Dr. Flavio Canavero

Department of Electronics and Telecommunications, Politecnico di
Torino, 10129 Torino, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPus /
SciFinder, Inspec, Ei Compendex and other databases.

Journal Rank:

JCR - Q2 (Physics, Applied) / CiteScore - Q1 (Electrical and
Electronic Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 16.4 days after
submission; acceptance to publication is undertaken in 2.4
days (median values for papers published in this journal in
the second half of 2024).
