Mobile Sensor Networks

Message from the Guest Editors

Sensor networks are an important technology asset in today's world. We investigate the developments in the mobile sensor networks branch of the said technology. Mobility is a key feature and challenge in contemporary computing. Among other things, mobility is strongly related to the ubiquitous presence and operation of sensor networks. Node mobility is manifested in the vast majority of application domains. Node mobility may be either controlled (e.g., robot mounted) or uncontrolled (e.g., car mounted). There are two important aspects that need to be taken into account. (A) the reactivity of the sensor network to location changes (seen from the information processing or networking perspectives) and (B) the possible control of the location of nodes in order to better satisfy the requirements of sensor network operation (e.g., maximize sensor network coverage). We, thus, treat the location context as controllable, i.e., can be observed (detected) and tuned (set). We invite innovative and prototypical contributions to all aspects of sensor network operations in the two study areas indicated above.

About the Journal

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guestedited by leading experts in selected topics of interest.

Editor-in-Chief

Prof. Dr. Flavio Canavero

Department of Electronics and Telecommunications, Politecnico di
Torino, 10129 Torino, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus /
SciFinder, Inspec, Ei Compendex and other databases.

Journal Rank:

JCR - Q2 (Engineering, Electrical and Electronic) /
CiteScore - Q1 (Electrical and Electronic Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 16.4 days after
submission; acceptance to publication is undertaken in 2.6
days (median values for papers published in this journal in
the second half of 2025).
