

Special Issue

New Generation Design of Antennas

Message from the Guest Editors

This Special Issue aims to address the recent development in this emerging area of versatile antennas, integration of programmable materials in antennas, and advanced manufacturing techniques, such as inkjet printing, flexo printing, 3D printing, etc., as well as the deployment of advanced materials such as graphene, carbon nanotubes, metamaterials, etc. We are looking forward to high-quality submissions that highlight the scope and applications of advanced antenna design techniques, such as massive multiple-input-multiple-output (MIMO), phased arrays, on-chip antennas, etc., and address the recent developments in manufacturing processes and advanced materials, as well as the prospective advantages of novel antenna design techniques that lead to adaptive, ultra-fast and highly secure wireless communication. The topics of interest include but are not limited to:

- Millimeter-wave antennas;
- 5G, 6G and beyond antennas;
- Flexible, conformal, 3D-printed antennas;
- Smart antennas;
- Multiple-input-multiple-output (MIMO) antennas;
- Antennas for biomedical applications;
- Phased arrays and massive MIMO antennas.

Guest Editors

Dr. Syeda Fizzah Jilani
Prof. Dr. Akram Alomainy
Dr. Qammer Abbasi

About the Journal

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guestedited by leading experts in selected topics of interest.

Editor-in-Chief

Prof. Dr. Flavio Canavero

Department of Electronics and Telecommunications, Politecnico di Torino, 10129 Torino, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, Ei Compendex and other databases.

Journal Rank:

JCR - Q2 (Engineering, Electrical and Electronic) /
CiteScore - Q1 (Electrical and Electronic Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.4 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the second half of 2025).
