

Special Issue

Advanced Modelling and Control of Complex Nonlinear Mechatronic Systems

Message from the Guest Editors

With the rapid development of computer-based technologies, a wide variety of complex mechatronic systems are used in different fields of application, such as robotic systems, manufacturing systems, heavy duty equipment, and transportation systems. Control technology is therefore considered as the key enabler for high-performance mechatronic applications. This year, the 23rd International Conference on Mechatronics Technology (ICMT) 2019 is held at the University of Salerno, Italy on October 23rd–26th, 2019. For further information about the 23rd IMCT 2019, please see: www.icmt2019.org. This Special Issue aims to publish the highest quality articles, including but not limited to selected papers from the IMCT2019, to contribute to the main theme of ‘Advanced Modelling and Control of Complex Nonlinear Mechatronic Systems’. **Keywords:** complex mechatronic system; nonlinearity and uncertainty; system identification; observer; model-based control; adaptive control; robust control; fault-tolerant control Welcome to contribute.

About the Journal

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

Editor-in-Chief

Prof. Dr. Flavio Canavero

Department of Electronics and Telecommunications, Politecnico di
Torino, 10129 Torino, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus /
SciFinder, Inspec, Ei Compendex and other databases.

Journal Rank:

JCR - Q2 (Engineering, Electrical and Electronic) /
CiteScore - Q1 (Electrical and Electronic Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.8 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
