

## Special Issue

# Non-orthogonal Multiple-Access Techniques in Next-Generation Wireless Communications

### Message from the Guest Editors

Dear Colleagues: With the rapid increase in the requirement for Internet-enabled smart devices and applications, wireless communications are confronted with various unpredictable challenges. As one of the promising types of multiple access, non-orthogonal multiple access (NOMA) has the ability to provide higher spectral efficiency and extensive connections. The aim of this Special Issue is to discuss the information theory and integration of NOMA with new physical layer techniques for future communication systems. In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following:

- The information theory in NOMA;
- Different variants of NOMA;
- Hybrid multiple access;
- Grant/semi-frant-free NOMA;
- Security provisioning in NOMA;
- Reconfigurable intelligent surface (RIS)-aided NOMA communication;
- Machine learning-based NOMA communication;
- Integrated sensing and communication (ISAC)-based NOMA;
- Enabling NOMA in backscatter communication;
- NOMA-assisted THz communication;
- Near-field NOMA communications.

We look forward to receiving your contributions.

---

### Guest Editors

Dr. Xinwei Yue

School of Information and Communication Engineering, Beijing Information Science & Technology University, Beijing 100101, China

Dr. He Sun

Department of Electrical and Computer Engineering, National University of Singapore, Singapore, Singapore

## About the Journal

### Message from the Editor-in-Chief

*Electronics* is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guestedited by leading experts in selected topics of interest.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus /  
SciFinder, Inspec, Ei Compendex and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Electrical and Electronic) /  
CiteScore - Q1 (Electrical and Electronic Engineering)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is  
provided to authors approximately 16.4 days after  
submission; acceptance to publication is undertaken in 2.6  
days (median values for papers published in this journal in  
the second half of 2025).
