

Special Issue

Practical Applications of Model-Driven Engineering

Message from the Guest Editors

Model-driven engineering (MDE) began as a software development methodology but has since been extended to a wide range of applications, also in the science of electronics and its applications. MDE promotes the usage of high-level and domain-specific modeling languages together with automatic transformations to improve all the activities during the development lifecycle. This Special Issue will be a forum to share practical applications of MDE and concrete experiences in information and control systems, both in critical and non-critical domains. In this context, we are envisaging works covering one or more of the following topics...

About the Journal

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guestedited by leading experts in selected topics of interest.

Editor-in-Chief

Prof. Dr. Flavio Canavero

Department of Electronics and Telecommunications, Politecnico di
Torino, 10129 Torino, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus /
SciFinder, Inspec, Ei Compendex and other databases.

Journal Rank:

JCR - Q2 (Engineering, Electrical and Electronic) /
CiteScore - Q1 (Electrical and Electronic Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 16.8 days after
submission; acceptance to publication is undertaken in 2.4
days (median values for papers published in this journal in
the first half of 2025).
