Medical Robots Making a Difference in Healthcare

Message from the Guest Editor

Healthcare is being changed by medical robots, which are improving the accuracy and speed of procedures as well as patient outcomes. These include robots used in surgery, rehabilitation, and patient care.

- Robots have been introduced into the rehabilitation process where they can contribute to helping patients recover from strokes or injuries through the provision of personalized therapy that adapts to individual progress.
- Through movement encouragement and real-time feedback provided by these robotic systems, more patients heal much faster from physical therapy.
- Medical robots also play a crucial role in patient care specifically with respect to hospital logistics management. Health workers can allow self-sufficient bots transport drugs, equipment, and other things such as sanitizing agents, freeing up their time for direct contact with patients.

Welcome to contribute.

About the Journal

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

Editor-in-Chief

Prof. Dr. Flavio Canavero

Department of Electronics and Telecommunications, Politecnico di
Torino, 10129 Torino, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPus /
SciFinder, Inspec, Ei Compendex and other databases.

Journal Rank:

JCR - Q2 (Physics, Applied) / CiteScore - Q1 (Electrical and
Electronic Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 16.4 days after
submission; acceptance to publication is undertaken in 2.4
days (median values for papers published in this journal in
the second half of 2024).
