

## Special Issue

# Power Electronics Converter Topologies and Control Techniques

### Message from the Guest Editors

Distributed power generation and micro grids are the future of our electrical system, where unstable renewable energy resources such as solar and wind can be stabilized by integrating battery storage.

Electrification in transportation and smart sensing technology also provide great opportunities. In such a complex system, highly effective energy conversion plays an important role in reducing energy consumption and tackling climate change. This Special Issue aims to present the latest development in power converter design and control techniques, including all related applications. The topics of interest include, but are not limited to:

- High-performance power converters;
- Power converter control and analysis;
- Solar and wind power;
- Energy storage;
- Electrical vehicles;
- Wireless power transfer;
- Induction heating;
- Thermal management.

## About the Journal

### Message from the Editor-in-Chief

*Electronics* is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

### Editor-in-Chief

Prof. Dr. Flavio Canavero

Department of Electronics and Telecommunications, Politecnico di  
Torino, 10129 Torino, Italy

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus /  
SciFinder, Inspec, Ei Compendex and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Electrical and Electronic) /  
CiteScore - Q1 (Electrical and Electronic Engineering)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is  
provided to authors approximately 16.8 days after  
submission; acceptance to publication is undertaken in 2.4  
days (median values for papers published in this journal in  
the first half of 2025).
