

## Special Issue

# Future Generation Wireless Communication

### Message from the Guest Editors

In order to provide heterogeneous services to massive devices, massive connections and diversified applications in the wireless networks, advanced transmission technologies with different features and requirements are desired. This Special Issue is devoted to a broad range of advanced signal processing techniques, designed for the modern and future physical layer of wireless networks. Novel research articles and review articles are welcomed, specifically on (but not limited to) the topics listed below

## About the Journal

### Message from the Editor-in-Chief

*Electronics* is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guestedited by leading experts in selected topics of interest.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, Ei Compendex and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Electrical and Electronic) /  
CiteScore - Q1 (Signal Processing)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.4 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the second half of 2025).
