

Special Issue

Immersive Quality of Experience Management and Evaluation

Message from the Guest Editors

In this Special Issue, we are looking for those groundbreaking research endeavors that push the limits of the current state-of-the-art in QoE management and evaluation. We are especially receptive to those efforts aiming to develop QoE management schemes in wired and wireless networks, QoE management strategies for Smart City services, evaluation methods for immersive QoE content, and QoE assessment models for different types of services. User QoE studies that bring new cognitions on how users perceive service quality are also welcome (for different use cases, services, types of networks). Therefore, researchers are invited to submit their manuscripts to this Special Issue and contribute their models, proposals, reviews, and studies
