

Special Issue

Networking Systems of Artificial Intelligence for Future Smart City

Message from the Guest Editors

This Special Issue aims to provide a platform for researchers, practitioners, and policymakers to exchange ideas, share experiences, and discuss the latest developments and challenges in NSAI for future smart cities. We invite authors to submit their original research articles, reviews, and case studies on this topic. We welcome submissions that address practical challenges, including, but not limited to, the following topics:

- B5G and Polymorphic Networking Protocols for Smart cities
- Security and Privacy in AI-enabled Smart City Networks
- Heterogenous Micro- and Nano-Electronics for IMCSC (Integrated Memory–Computing–Sensing–communications)
- AI-Empowered Smart Services and Applications
- Applications of AI in Smart City Governance, Citizen Participation, and Public Services

We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.
