

Special Issue

RF/Microwave Antenna, Circuit, and System Design for UAV Applications

Message from the Guest Editor

Recently, unmanned aerial vehicle (UAV) applications have been gradually expanding from military use to commercial service due to remote control and autonomous flight. UAVs have lots of potential for our real life because it can conduct remote sensing and monitoring, communications relay, weather observation, disaster relief, and so on. In order to perform intelligent missions, it is essential that UAVs communicate with a ground base station, satellite or another vehicle. Due to the characteristics of the operating environment in UAVs, RF/Microwave antenna and system technologies with a compact size, light weight, aerodynamic structure, and wide-beam coverage are required. In this special issue, we invite researchers to submit their original research or review articles that are concerned with recent advances in antennas, circuits, and systems for UAV applications. Potential topics include, but are not limited to:

- Anti-drone Microwave Technologies
- RF/Microwave antenna and system design for UAVs
- Wireless power and data transfer of UAVs
- UAV tracking antennas
- UAV antennas
- UAV applications

About the Journal

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

Editor-in-Chief

Prof. Dr. Flavio Canavero

Department of Electronics and Telecommunications, Politecnico di
Torino, 10129 Torino, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus /
SciFinder, Inspec, Ei Compendex and other databases.

Journal Rank:

JCR - Q2 (Engineering, Electrical and Electronic) /
CiteScore - Q1 (Electrical and Electronic Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 16.8 days after
submission; acceptance to publication is undertaken in 2.4
days (median values for papers published in this journal in
the first half of 2025).
