

Special Issue

AI for Edge Computing

Message from the Guest Editors

The focus of this Special Issue proposal is on AI for edge computing, because “letting AI enhance the performance of edge computing” and “letting AI run on edge” are two promising research topics nowadays, especially in modern information systems, such as the traffic light control system and other relevant smart city applications. Among the issues, **downsizing** machine learning, data mining, deep learning to make them run on the edge, finding a set of **suitable hyperparameters**, and even searching for a **good neural architecture** for the deep neural network have attracted the attention of researchers from different disciplines. That is why this Special Issue will be focusing on intelligent algorithms for edge computing and their applications, such as downsizing and accelerating solutions of AI and edge devices/servers. It is expected that this Special Issue will attract a lot of submissions from the research societies of AI, the Internet of Things (IoT), Wireless Sensor Network (WSN), smart city, and so forth. We can then select some high-quality papers from them to further increase the reputation and impact of ICT Express.

About the Journal

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

Editor-in-Chief

Prof. Dr. Flavio Canavero

Department of Electronics and Telecommunications, Politecnico di
Torino, 10129 Torino, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus /
SciFinder, Inspec, Ei Compendex and other databases.

Journal Rank:

JCR - Q2 (Engineering, Electrical and Electronic) /
CiteScore - Q1 (Electrical and Electronic Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.8 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
