

Special Issue

Recommender Systems and Technologies in Artificial Intelligence

Message from the Guest Editors

This Special Issue is particularly interested in papers that either provide evidence that detecting each user's emotions, behaviour, context and reactions makes a difference or show progress in building accurate, user-centred recommender systems that take advantage of an increasing number of data for each user in different scenarios and tasks, bearing in mind that the real problem is to model the user within them. Submission Topics:

- Wearable-based affect-recognition systems;
- Affect-recognition systems from low-cost, off-the-shelf devices;
- Sensor data quality assessment and management;
- Machine-learning/artificial-intelligence approaches to obtaining personalized models for affect recognition;
- Intelligent recommender systems in user-centred scenarios ;
- Context-aware recommendation systems;
- Methods and tools for affect-aware intelligent tutoring systems;
- Adaptive systems that improve the performance of the user;
- Affect-aware user models in semi-automated systems;
- Experimental datasets;
- Regulations and standards;
- Privacy and ethics regarding user-centred recommender systems.

Guest Editors

Prof. Dr. Jesús G. Boticario

Prof. Dr. David Martín Gómez

Dr. Ana Serrano Mamolar

About the Journal

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

Editor-in-Chief

Prof. Dr. Flavio Canavero

Department of Electronics and Telecommunications, Politecnico di
Torino, 10129 Torino, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus /
SciFinder, Inspec, Ei Compendex and other databases.

Journal Rank:

JCR - Q2 (Physics, Applied) / CiteScore - Q2 (Control and
Systems Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 16.4 days after
submission; acceptance to publication is undertaken in 2.4
days (median values for papers published in this journal in
the second half of 2024).
