

## Special Issue

# Real-Time Embedded Systems: Architectures, Software and Applications

### Message from the Guest Editors

This Special Issue welcomes contributions in the area of embedded and real-time systems and their emerging applications. Topics of interest include, but are not limited to, the following:

- Real-time embedded systems and applications (e.g., in manufacturing, IoT, ubiquitous, cloud and edge computing, mechatronics and robotics, automotive and autonomous vehicles, health-care services, smart buildings, and smart cities)
- Real-time system architectures and real-time operating systems
- Real-time systems design and analysis tools and techniques
- Energy efficient real-time systems and applications
- Real-time embedded systems performance issues

## About the Journal

### Message from the Editor-in-Chief

*Electronics* is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guestedited by leading experts in selected topics of interest.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus / SciFinder, Inspec, Ei Compendex and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Electrical and Electronic) /  
CiteScore - Q1 (Electrical and Electronic Engineering)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.4 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the second half of 2025).
