

## Special Issue

# Recent Trends in Intelligent Systems

### Message from the Guest Editors

Nowadays, intelligent systems are present everywhere. Powerful machines and existing communications allow our lives to be directed in many ways by these systems. This ranges from machines to intelligent software agents with the ability to learn, plan, and solve complex problems. The main purpose of this Special Issue is to attract high-quality articles detailing recent research as well as review articles on recent developments in intelligent systems. Topics relevant to this Special Issue may include (but are not limited to):

- Distributed intelligent systems
- Image processing
- Organizational systems
- Expert systems
- IoT
- Swarm systems
- Intelligent virtual educational systems

## About the Journal

### Message from the Editor-in-Chief

*Electronics* is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guest-edited by leading experts in selected topics of interest.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPus /  
SciFinder, Inspec, Ei Compendex and other databases.

#### Journal Rank:

JCR - Q2 (Physics, Applied) / CiteScore - Q2 (Control and  
Systems Engineering)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is  
provided to authors approximately 16.4 days after  
submission; acceptance to publication is undertaken in 2.4  
days (median values for papers published in this journal in
