Recent Trends in Intelligent Systems

Message from the Guest Editors

Nowadays, intelligent systems are present everywhere. Powerful machines and existing communications allow our lives to be directed in many ways by these systems. This ranges from machines to intelligent software agents with the ability to learn, plan, and solve complex problems. The main purpose of this Special Issue is to attract high-quality articles detailing recent research as well as review articles on recent developments in intelligent systems. Topics relevant to this Special Issue may include (but are not limited to):

- Distributed intelligent systems
- Image processing
- Organizational systems
- Expert systems
- IoT
- Swarm systems
- Intelligent virtual educational systems
