Special Issue

Recommender Systems and Data Mining

Message from the Guest Editors

This Special Issue aims to cover the recent emerging trends and applications for Recommender Systems and Data Mining. Topics of interest include, but are not limited to:

- Context-aware Recommender Systems;
- Affective Recommender Systems;
- Trustworthy Recommender Systems;
- Intelligent Recommender Systems in User-centred Scenarios (e.g., medicine, education, transportation, etc.);
- Human Decision Making in Recommender Systems;
- Implicit versus Explicit Feedback in Recommender Systems;
- Content-based Recommender Systems;
- Context-aware Recommender Systems;
- Personalization in Recommender Systems;
- Deep learning/reinforcement learning/federated learning in Recommender Systems;
- Meta-learning in Recommender Systems;
- Hybrid Recommender Systems;
- Recommender System Evaluation and Metrics;
- Scalability and Performance of Recommender Systems;
- Explanation and Interpretability of Recommender Systems;
- Ethical and Privacy Issues in Recommender Systems.

About the Journal

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guestedited by leading experts in selected topics of interest.
