

Special Issue

Applied Technologies for Renewable Energies Integration in Power Systems

Message from the Guest Editors

Power and energy conversion, distribution and management face critical challenges in the current context of energy transition. Novel equipment designs, control strategies, approaches and techniques are being developed to achieve the necessary improvements in full-scale power systems. Integrating renewable energy sources, storage and distribution in a conventional electrical grid network is also a fundamental milestone toward achieving the smart grid concept. Novel emerging energy vectors, such as marine power and biofuels, and classical energy vectors, such as wind or solar energy, constitute the distributed generational core of future smart grid. Their integration should be able to cope with the associated generation intermittencies and uncertainties. The scope of this Special Issue comprises renewable energies conversion efficiency, enhancement in power quality, applied techniques for electrical machines and generation, novel power electronic equipment, smart sensors, renewable energies integration, marine power, on-shore and off-shore wind power, solar power, biofuels and biomass.

About the Journal

Message from the Editor-in-Chief

Electronics is a multidisciplinary journal designed to appeal to a diverse audience of research scientists, practitioners, and developers in academia and industry. The journal is devoted to fast publication of latest technological breakthroughs, cutting-edge developments, and timely reviews of current and emerging technologies related to the broad field of electronics. Experimental and theoretical results are published as regular peer-reviewed articles or as articles within Special Issues guestedited by leading experts in selected topics of interest.

Editor-in-Chief

Prof. Dr. Flavio Canavero

Department of Electronics and Telecommunications, Politecnico di
Torino, 10129 Torino, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), CAPlus /
SciFinder, Inspec, Ei Compendex and other databases.

Journal Rank:

JCR - Q2 (Engineering, Electrical and Electronic) /
CiteScore - Q1 (Electrical and Electronic Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 16.8 days after
submission; acceptance to publication is undertaken in 2.4
days (median values for papers published in this journal in
the first half of 2025).
